

case study

Swiftclean has partnered with WHP Telecoms since the start of 2025. We support them in achieving full compliance across the water systems in all 12 of their UK sites, helping to safeguard their teams from potential Legionella outbreaks.

As long-standing members of the Legionella Control Association, Swiftclean provides expert guidance and delivers services aligned with the Approved Code of Practice (L8 – The Control of Legionella Bacteria).

ABOUT

WHP Telecoms delivers comprehensive solutions to the UK's mobile and fixed-line communication sectors - covering design, planning, construction, installation, and final commissioning.

Founded in the 1980s, they have grown into a £225m turnover business with more than 850 employees operating across 12 UK locations.

Their commitment to "right first time" strongly aligns with Swiftclean's own values of quality, compliance, and reliability.

CLIENT SATISFACTION

Their Compliance Advisor, Taryn Caleno, adds:

"We've worked with Swiftclean for a while now – and feel reassured that our water systems are clean and compliant. In particular, our thanks must go out to Brandon, our sales point of contact for all his support. He guides us through every step of the process with clarity and care. The Swiftclean surveyors are equally knowledgeable, efficient, and clearly dedicated to delivering high-quality results."

WORKING TOGETHER

At the beginning of 2025, WHP Telecoms approached Swiftclean for Legionella risk assessments at 12 of their sites. Over the past year, our partnership has developed significantly, and we now support them with:

- Legionella risk assessments
- Remedial works
- TMV testing
- Schematic drawings

Swiftclean has become their trusted supplier for water hygiene compliance, and as new offices open, we are contacted automatically to support with their water systems management.
